DETAIL OF ACCREDITATION

Flexible Scope

The laboratory is accredited for the use of a Flexible Scope for testing activities in the area(s) of EMC (Commercial and Automotive).

This may include tests on the same or similar product types, against standards or customer-specified methods that are not specifically listed in this Schedule for EMC testing, providing that:

- [1] The method or standard does not introduce new principles of measurement;
- [2] The method or standard does not require measurements to be made outside the parametric boundaries defined in this Schedule.

Information about Flexible Scopes of accreditation is available in UKAS document GEN 4 publicly available from the UKAS website.
