Flexible Scope

The Flexible Scope applies to the laboratory's accreditation to ISO/IEC17025:2017 and GEN 4:2019 for testing activities in accordance with the standards listed in the schedule for EMC, Radio, SAR and BLST (TEL site only) – internal procedure Standard Operation Procedures-ULID-006194. This may also include tests on the same or similar product types against standards, or customer-specified methods, that are not specifically listed in this Schedule, providing that:

(1) The method or standard does not introduce new principles of measurement. (2) The method or standard does not require measurements to be made outside the parametric boundaries defined in this Schedule.

For Built Environment activities in Telford the flexible scope applies to:

Weathertightness, durability and security tests of Windows and doors, curtain walling, rainscreen cladding systems and components, glass and glazing, to technically equivalent test methods and updated versions of standards for which the laboratory is accredited and any combination of the above, within the ranges of:

Force up to 20.0 kN

Water pressure up to 4 bar

Differential air pressure up to 500 Pa on site and 10 kPa in laboratory

Torque up to 200 Nm

Gas flowrate up to 360m³/hr

Liquid flowrate up to 20,000 l/h

Dimensions including height, width and depth up to 10m

Mass up to 300 kg

Documented In-House Methods developed using Standard Operation Procedure-ULID-006194
